EXPERIENCE

Atlabs AI Founding Designer — Dec 2024 - Present

- First designer at an AI video startup, now at **$2.5M ARR**. Since I joined, it has grown from 4 to 9 creation workflows.
- Designed the **video teaser** for free users, which blurs later scenes and is now where free users upgrade to paid.
- Designed our first mini tool, Create Image (**~6.8k creators, ~55k images**, monthly users up ~2.6×), then **20+ tools** on the same layout.
- Designed AI Edit, a chat for changing any shot in plain words, with scope tabs, starter prompts and an on-canvas prompt button.
- Designed the rest of the editor: timeline, lip sync with waveform trimming, voiceover pronunciation, split scene, captions and B-roll.
- Ship small design fixes myself with Claude Code: **68 merged PRs** into the production React/TypeScript app since Mar 2026.
- Also run product analytics in Mixpanel and Clarity, the site's SEO pages and A/B-tested emails, and am hiring design interns.

Xalts Product Design Intern — May - Jul 2024

- Designed a web-based Fireblocks integration for custodian wallets, improving security and compliance for **50+ clients**.
- Built **10+ documented components** for the Xalts design system and a standard icon library for business teams.

ClearFeed Product Design Intern — Jan - Sep 2023

- Designed setup, test and activation flows that let **50+ support teams** auto-answer repeat Slack queries from their docs.
- Generated answers solved **12%** of queries and made replies **1.6×** faster; setup reached **96%** task success.
- Grew website traffic by **up to 25%** with usability-led UX fixes.

Curelink Product Designer, Freelance — Dec 2022 - Jan 2023

- Added a gamified dashboard and rewards to lift patient enrollments, and designed the coordinator flow after each enrollment.
- Built 15+ components and 5+ micro-animations for **500+ daily users**.

Explorin Product Design Intern — May 2021 - Jul 2022

- Led the website relaunch in a team of four, from idea to launch, lifting conversion by **50%**.
- Designed onboarding, gamified dashboards and goal management, shaped by 20+ user interviews and 10+ usability tests.
